DETAILED ACTION

The following is a response to the amendment received on August 4, 2008 which has been entered.

Response to Amendment

Claims 1-8 and 10-18 are pending in the application. Claim 9 has been cancelled.

-The 102(b) rejection of claims 1, 7, 8 and 10 has been withdrawn due to applicant amending claim 1 with limitations not disclosed by the prior art of record used in the rejection.

-The 103(a) rejection of claim 11 has been withdrawn due to the withdrawal of claim 1 as stated above.

Allowable Subject Matter

Claims 1-8 and 10-18 are allowed.

The following is an examiner's statement of reasons for allowance: The prior art of record does not disclose or render obvious a motivation to provide for:

-(as to claim 1) a property correcting system for an automatic transmission measuring a controlled variable hydraulic control valve relative to a difference between an input revolution and turbine revolution of a torque converter in which the input revolutions of the torque converter are set to be constant and storing an amount of correction based on the controlled variable and in combination with the remaining limitations of claim 1.

-(as to claim 4) a property correcting system for an automatic transmission measuring a controlled variable hydraulic control valve for keeping constant a difference between an input revolution and turbine revolution of a torque converter under a set condition and reflecting a differential value between the measured value of the control valve and a reference value to a learning result for learning the property of the transmission and in combination with the remaining limitations of claim 4.

-(as to claim 5) a property determining system for an automatic transmission measuring a controlled variable hydraulic control valve for keeping constant a difference between an input revolution and turbine revolution of a torque converter and using the measured value of the control valve to determine shipment of the transmission if the value is within a preset allowable range and in combination with the remaining limitations of claim 5.

-(as to claim 12) a property correcting system for an automatic transmission measuring a controlled variable hydraulic control valve relative to a difference between an input revolution and turbine revolution of a torque converter and storing an amount of correction based on the controlled variable to control the transmission wherein shipment of the transmission is determined if the measured value of the control valve is within a preset allowable range.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
